

ROUDYBUSH™

DAILY MAINTENANCE

The **Daily Maintenance** formula is an every day diet designed for adult birds that are in good health. Use this diet when switching your bird from its old diet to Roudybush. Continue to feed to adult birds that are not laying eggs or feeding chicks. Lories and lorikeets, which will accept this diet, will have drier droppings than they have on nectar. Do not give additional vitamin or mineral supplements. Fresh fruit and vegetable treats may be given as a minor part of the diet.
